

### ALG1 (involved in glycosylation)

### DPM1 (DPM1)

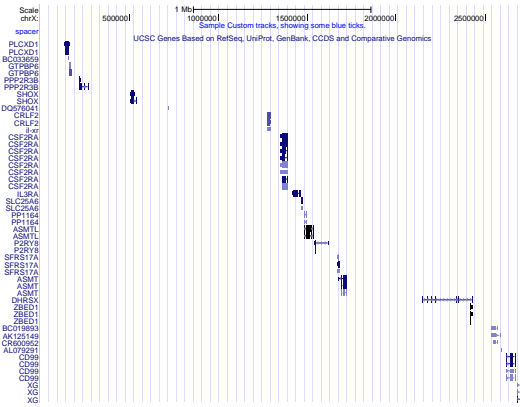

### GSC (a gene chosen at random)

### IL10 (involved in immunity)

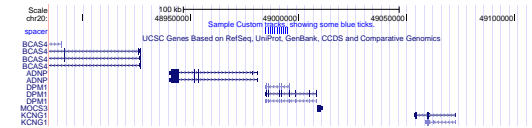

### PAR1X (Pseudo-autosomal Region, chromosome X)

### COX2 (involved in inflammation)

### DPM1\_100kwindow (DPM1 with a 100k zoom out)

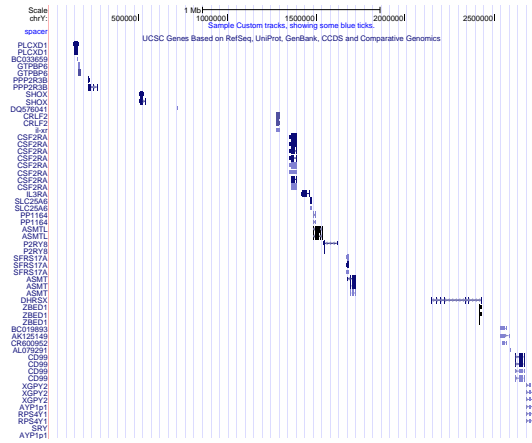

### HSPB4 (Heat-shock protein)

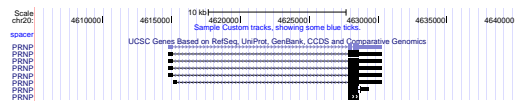

### OXTR (potentially associated to positive behaviour)

### PAR1Y (Pseudo-autosomal Region, chromosome Y)

PRNP (Prion Protein)

ZGPAT (another gene chosen at random)
